SUMMARY

A sincere and self-motivated B.Tech Information Technology student in the second year at Dr. N.G.P. Institute of Technology, with a strong foundation in C, Python, and Java, and hands-on experience in full-stack development including frontend (HTML, CSS, JavaScript) and backend technologies, passionate about learning, problem-solving, and building efficient applications while continuously enhancing technical skills and gaining practical industry experience.

PROJECTS

ChatBot For College Enquiry

Sep 2024 - Jun 2025

Developed a College Enquiry Chatbot using Python and JavaScript to provide instant responses to student queries related to admissions, courses, and fees. Designed an interactive user interface using HTML and CSS, improving accessibility of information and user experience.

Hardware Assisted USB Port Security Lock For Data Protection

July 2025 - Apr 2026

Developed a hardware-assisted USB port security system using Arduino Uno, USB Host Shield, and a relay module to prevent unauthorized data access. Implemented device control and monitoring through Arduino IDE, and integrated Python with ClamAV for real-time malware detection, ensuring secure and protected data transfer.

Online Shopping Management System

Developed a full-stack Online Shopping Management System by integrating frontend, backend, and MySQL database. Designed responsive user interfaces using HTML, CSS, and JavaScript, and implemented backend functionality to manage products, users, and orders efficiently, ensuring seamless data handling and user experience.
